Smt K.Audiseshamma, Lecturer in Botany is the Deputy Warden of the Hostel.

Problems:

Despite the achievements that we are able to place on record here before you the college is facing problems in these areas. In view of the severe power shortage the college would like to become self sufficient in generating power at least to some extent and also create green energy by opting for solar power system and the college requests the support of philanthropists and the authorities in the initial establishment of the equipment for this purpose. Similarly in a women's college with more than 1000 students and staff the bathroom facilities are severely disproportionate in number and we request the support of authorities in the construction of the bath rooms too.

Finally I wish good luck to students in their forth coming examinations and I thank you all for being a part of this occasion.
